A.4 BACKGROUND

The District of Columbia Office of the Chief Technology Officer has multiple technology Data Center infrastructure build-out and upgrade initiatives. OCTO's new Data Center will be built on best in class, highly scalable, secure, and reliable networking and communications infrastructure supporting District government agencies' mission critical applications. OCTO will deploy the foundation to support City-wide growth in bandwidth consumption, emerging technologies, and demands for new applications in cloud computing, unified communications, and Internet of Things. Data Center access span across multiple district agencies facilities in the District of Columbia enabling an integrated, simplified, cost-efficient and secure provider edge network for the DC-Net's IP/MPLS backbone. This hardware is required to build and provision a network infrastructure across the city facilities enabling access to new data center. Cisco hardware and associated software and subscriptions are required to complete this effort.
